SHUGG™

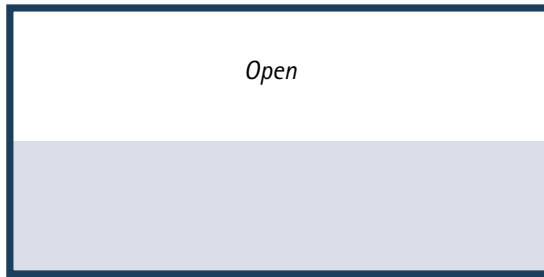

Window and balustrade in one innovative unit

Popular Cafe style single hung widows are the new architectural design solution, with a large expanse of glass allowing unobstructed panoramic views and clean lines.

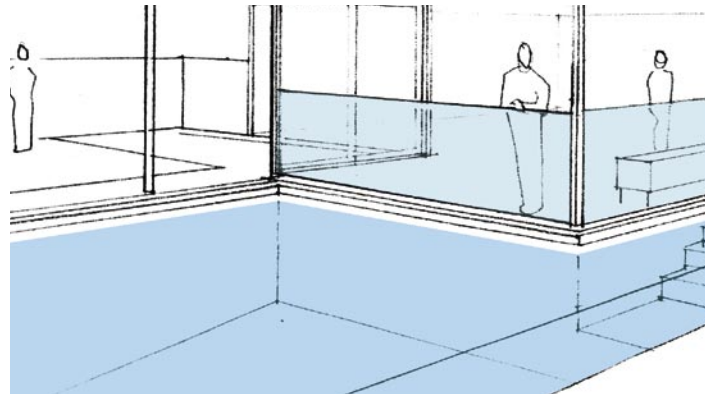

Once open they can provide a fixed safety barrier for pools or high areas.

SINGLE HUNG

Bottom fixed

Super Shugg single hung sliding function

In this single slider variation, the bottom pane is fixed while the top is counterbalanced.

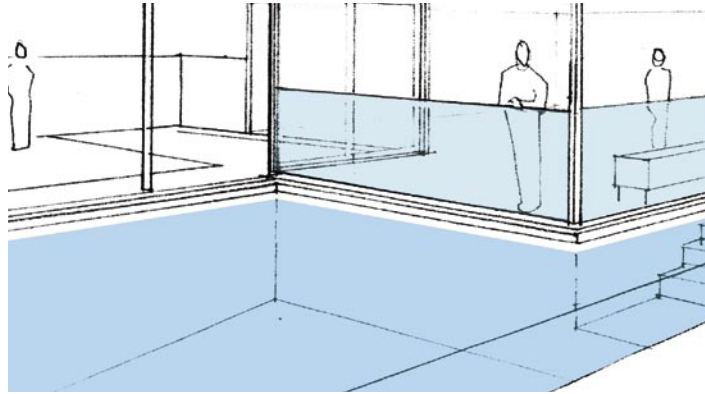

The top pane may be lowered to provide ventilation or raised into an internal cavity.

With a fixed lower pane and sliding top pane, a fall or a swimming pool area can be protected with the lower pane becoming a balustrade.

SHUGG™

Super large vertical sliding windows

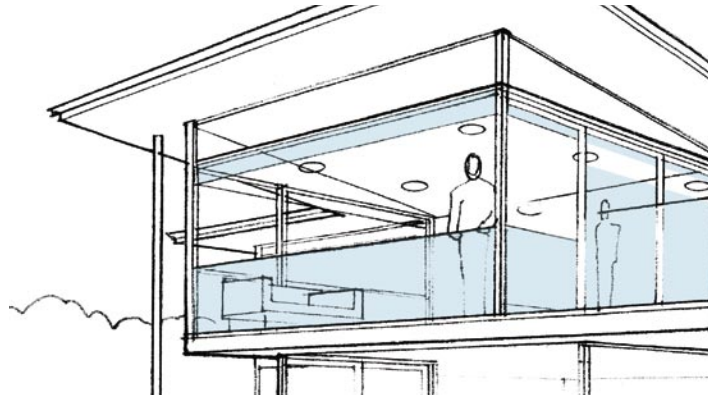

Super Shugg for swimming pools

Swimming Pools are particularly constrained by safety requirements and this is where the Super Shugg comes into its own, by maintaining the visual integrity of the architectural design while still fulfilling the legal and practical requirements.

SHUGG™

Super large vertical sliding windows

Super Shugg for heights

Super Shugg's unique balustrade and window combination enables the top half of the window to be lowered. This provides ventilation and gives that outdoor feeling while maintaining strict safety criteria.

SHUGG™

Super large vertical sliding windows

Shugg sashless double hung windows

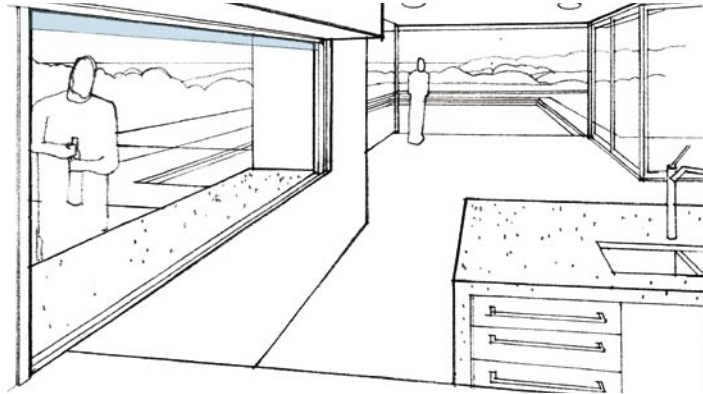

The Shugg vertical sliding window system combines clean, elegant vertical lines with a sashless, non projecting design and provides unobstructed access to pathways, decks and gardens. Shugg double sliding windows are perfect for taking advantage of spectacular views but allowing ventilation at the same time.

The minimalist shugg extrusions fit into and compliment most architectural styles. Shuggs can be inserted into aluminium, timber, or combination windows and doors.

SHUGG™

Double hung sliding windows

Shugg single sliders

This single slider can be used as a pass through window.

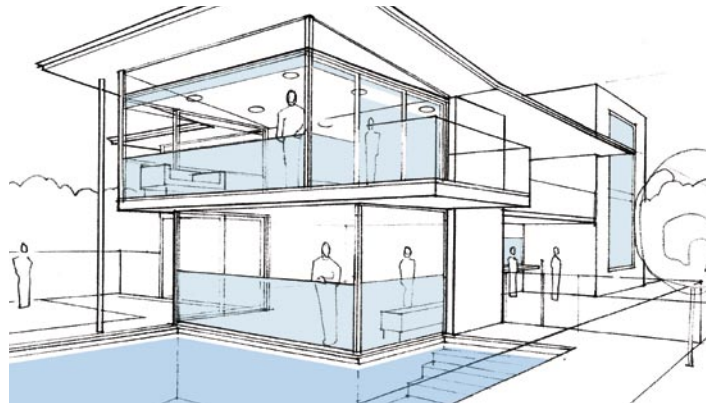

Most sizes can be accommodated, from larger commercial formats to smaller domestic sizes that are ideal for the kitchen and dining area.

SHUGG™

Top fixed vertical sliding windows

Key Features

- Non-projecting for safety
- High and low level ventilation
- Allows unobstructed views
- Replaces sashes without the need to remove existing frames
- Fits all brands of aluminium and timber joinery
- Fits into aluminium or timber doors
- Can be locked in an open position
- Clear midseal eliminates draughts and noise

Shugg technical information

Product Detail

Glass

Timber Profiles

- Cedar and Pine in stock
- Other timbers can be sourced

Size & Shape

- Square, raking, curved or arched head
- Most frame sizes suitable
- Shugg windows are custom made for each installation

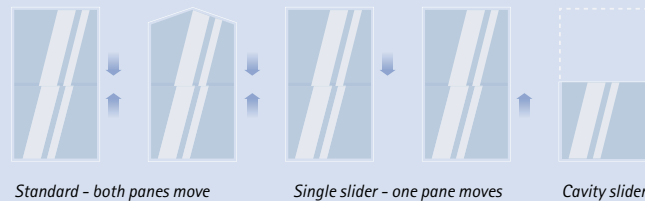

Super Shugg

Super Shugg balcony sliders – probably the most exciting area of development has been working with architects and designers to create these large format windows that act as a balustrade when the top pane is lowered.

These large balcony sliders have already made an impressive impact on the Restaurant and Cafe scene and are now being used in domestic and commercial areas to create contemporary design statements.

Standard Shugg options

Shugg allows excellent ventilation

Shugg mounted in door
